NEWS FROM THE PEQUANNOCK RIVER COALITION

West Brook Siphon Repaired

August 26, 2011

Over last winter, ice split the main pipe for our siphon on the West Brook that serves to carry cooler water over a pond dam, benefiting trout and other species downstream.

This is an expensive pipe to replace, and we asked Steve Norman of the CMS Group to design a low-cost alternative to replacing it. Repair work was put off by high water in May and June, but we finally had a chance in July. The damaged section of the pipe was cut away and replaced with a PVC sleeve, Simple, inexpensive and effective. The siphon is back in action.

Thanks Steve!
